Fifty Years On, **Southeast Asia** Emerges as Global Growth Leader

By [Melissa Cheok](#)

August 7, 2017, 5:00 AM GMT+8

The Association of Southeast Asian Nations has much to crow about as it marks its 50th anniversary: economic and social progress, a manufacturing powerhouse and relative political stability.

The 10 Asean members boast of some of the world's fastest expanding economies like the Philippines and Vietnam, with growth rates of more than 6 percent. With a combined population of over 620 million and an economy of \$2.6 trillion, the investment potential is huge and by 2020, the region will have the world's fifth largest economy, the World Economic Forum predicts.
